## Hyundai from Nošovice Launches a New Round of Applications for the Together for Electromobility Program

- The Silesian Hyundai car manufacturer continues its program allowing municipalities and organizations in the Moravian-Silesian Region to use a Hyundai Kona Electric free of charge for 6 or 12 months.
- Applications for the “Together for Electromobility” program can be submitted from April 15, 2025, via the portal [hyundai.grantys.cz](https://hyundai.grantys.cz)

**Nošovice, April 15, 2025** – Hyundai Motor Manufacturing Czech (HMMC) is launching a new round of its Together for Electromobility grant program, aimed at supporting and promoting the development of e-mobility in the Moravian-Silesian Region.

From April 15 to May 15, 2025, not only municipalities and cities, but also a wide range of regional organizations and institutions can apply for the free loan of a Hyundai Kona Electric for 6 or 12 months.

“We want to give successful applicants the opportunity to try out an electric vehicle in everyday use and show them the benefits of zero-emission transport. First-hand experience with an EV may inspire further steps toward future mobility in the region,” says Barbora Hermanová, Head of Public Relations at the Nošovice plant.

### Who can apply?

- Municipalities, cities, voluntary associations of municipalities
- Regional associations, foundations, endowment funds, institutes, and public benefit organizations
- Church legal entities, schools, public contributory organizations
- Government bodies, state or national enterprises operating in the fields of environment, healthcare, education, research, development, or culture

Applicants must be based in or operate within the Moravian-Silesian Region. Complete details, including program terms and the application form, are available on the HMMC website:

<http://www.hyundai-motor.cz/en/about-company/grant-programs/>

Currently, Hyundai Kona Electric vehicles are on loan to the Pavel Novotný Endowment Fund, the organization *Šance podaná ruka*, the town of Frýdlant nad Ostravicí, and the Diocesan Charity Ostrava-Opava.

#### **Hyundai Motor Manufacturing Czech (HMMC)**

The high-capacity HMMC plant began production in Nošovice in November 2008. A record year was 2016, when 358,400 cars were produced at the Nošovice plant. The Tucson model has consistently accounted for the largest share of production, making up approximately 70% of the plant's total output. Vehicles from HMMC are sold in more than 70 countries across five continents.
